

I am a USU alumni now working at Idaho National Lab (INL). There is a government internship program every year, that never has enough CS students apply. There is a very high rate of students getting accepted and then being placed in internships. Could you get this info to your students or add it to a listing if you have one?

DOE sponsored internships. (Due January 12)

You can select which national lab you would prefer. (INL has a many opportunities for cyber security, AI, scientific computing (HPC), and advanced web applications.)

There is one for graduate and undergraduate.
