

"Maiden Voyage Software, LLC is a custom software company looking to hire on students for part time work. In this position, you would be coding the front end of the software application. We have someone who will design mock-ups for the web application and it will be your responsibility to turn them into a functional website. This will be a remote position.

You will need to feel comfortable coding in HTML, CSS, Javascript, and a front end framework, preferably vue.js. Although not required, experience in PHP and MySQL would be preferred. You will need to attend client meetings, as necessary.

This position would be very flexible and would not guarantee any minimum hours of work per week. Depending on experience, the pay rate is starting from \$10-\$16. Please email your resume to hello@yourmaidenvoyage.com."

We look forward to receiving resumes from the students at Utah State University.
Thank you
