Subject: [EXT] Remote/Flexible, Paid Internship for Students

Hi Cora,

I wanted to quickly let you know that Numerade is currently offering remote, flexible, and paid internship opportunities for undergraduate and graduate students. We are offering two different types of internships. One will help develop lesson videos for middle school and high school students in the intern's subject matter or expertise. The other is a business development role that will rely on sales and marketing skills. These two roles will help your students earn experience, receive an income, and further master STEM subject material through explanation.

Here's an example of one of our [undergraduate educators](#) creating video lessons as an intern.

If you could please share this message with students to offer them this opportunity:

Thank you and let me know if you have any questions!

Dear Students,

Numerade is offering flexible, remote and paid internship opportunities! They have one educational opportunity to develop STEM content for middle school and high school students. The outcomes of this internship will provide you with experience developing project and time management, teaching, and increase subject matter expertise. If you're interested in applying please go sign up at this [link](#) and select "content creator."

They are also offering a Business Development/Marketing internship. In this role you will learn the principles of content marketing, creative copywriting, and sales best practices. If you would like to apply for this role please follow this [link](#).

Thank you!
